We complain about the heat...

but what are we doing to bring back the shade?

Jalte Diye Foundation

Before

After

Recently we posted about our *Miyawaki* technique based forestation project.

This July 2026, we are taking a small but real step.

We are creating a dense forest… using the *Miyawaki* method.

A forest that grows faster...
stays stronger...
and gives back to the earth.

But we cannot,
do this alone.

With a minimum amount
such as ₹50...
you can plant a tree.

And become part of
something that will live for years.

Scan this…
and plant your tree today.

Let’s not wait for change…
let’s grow it.

Donation would be made to the Foundation through

Director
